2025 DEALER CATALOG

MANIFEST YOUR OUTER HOME

Manifest your outer home.

**For more than 70 years,
homeowners have turned
to Larson to protect
and enjoy their homes
with our high-quality,
high-performance
home solutions.**

As America's trusted storm door brand, we are committed to inspiring better living at every threshold. A Larson storm door is so much more than a door — it's a simple addition that elevates your entryway into a place of comfort, safety and style. Whether you're sitting on your porch or walking through your foyer, you can let the best of nature in while keeping the worst of it out.

2025 New Products & Innovations

The best view money can buy.

The **new** 150 Maximum View gives you the best view you can get from a storm door. Our largest window opening features a solid panel of tempered glass for an unobstructed view and maximum natural light.

Listen for the click as SureLatch[™] magnetic technology helps your door close with a smooth, confident latch for years to come.

Maximum view doors deliver 5% more view than similar models.

New Storm Door Options¹

NEAT+[™] LOW-E GLASS

Designed for less cleaning, Neat+ coating fills the tiny pores in glass to create an exceptionally smooth surface that quickly and evenly disperses water to wash away debris and help prevent watermarks.

BETTERVUE[®] SCREEN

Wicks away water and grime for a clear view.

New QuickFit[™] Handleset Finish

Curved QuickFit handleset now available in Matte Black.

New Frame Color

Bordeaux^{1,2}

¹Currently only available on 150 Maximum View.

²Available Q3 2025

Note: Product finish colors are approximate; actual finish colors may vary. See your Larson seller or visit larsondoors.com for details on limited warranties and exclusions.

Find Your New Storm Door

Create the entry that matches your lifestyle from our wide selection of storm doors. Whether you want extra protection for your home, more fresh air and natural light, or freedom for your pet, we have the right door for you.

VENT OPTIONS

Retractable

Built-in screen offers fresh air or clear views at your fingertips.

Interchangeable

Included screen opens your home to the best of each season.

Standard Venting

Built-in screen stays in the window for convenient ventilation.

PET OPTIONS

Pet Door

Pre-installed pet door lets your pet come and go as they please.

VIEW OPTIONS

Maximum View

Our largest window opening for maximum natural light.

Fullview

The full door is a window with only a frame surrounding it.

Midview

Most of the door is a window with a small panel at the bottom.

Highview

The door is half window, half panel for extra privacy.

CLOSER OPTIONS

Reliable open and close with premium hold-open options.

EXCLUSIVE INNOVATIONS

SureLatch[™] magnetic technology helps securely latch your door every time.

Maximum view doors deliver 5% more view than similar models.

Platinum Collection

Experience a truly premium entryway with the advanced features and sleek, modern design of the Platinum Collection.

EXCLUSIVE PLATINUM COLLECTION FEATURES

10-minute install¹ with no experience or special tools required.

Hidden push-to-hold closer holds the door in place with an extra push.

Premium aluminum frame and 3X the weatherstrip seal for ultimate weather protection.

Multi-point locking system secures the door at three critical points.

¹Preparation time not included. Based on typical installation. Actual times may vary.

456 Platinum Retractable Screen

OUR PREMIUM RETRACTABLE MODEL

Invite fresh air into your home with the touch of a finger and enhance your home's style with the feature-rich and elegant design of the Platinum Collection.

TOP BENEFITS

Fresh air on demand. Fresh air or clear views at your fingertips with just a pull on the retractable screen.

10-minute install.¹ Out of the box and on your home in 6 DIY-friendly steps – no experience or special tools required.

Concealed performance. Hold the door in place with just an extra push with the hidden push-to-hold closer.

Robust defense. Shield your entry against harsh weather with a heavy-duty aluminum frame surrounded by 3X the weatherstrip seal for the ultimate weather seal.

ADDITIONAL FEATURES

- Multi-Point Locking System
- Pre-Installed Hinges
- Pre-Drilled Handleset Holes
- Pre-Attached Screw Covers

¹Preparation time not included. Based on typical installation. Actual times may vary.

²Custom doors have extended, variable lead times. Once placed, custom orders cannot be canceled.

³Order in increments of three (same finish) for reduced pricing.

Note: Larson reserves the right to alter or discontinue any model, specification, warranty or price without notice. Product finish colors are approximate; actual finish colors may vary. See your Larson seller or visit larsondoors.com for details on limited warranties and exclusions.

Measuring Guide:

PLATINUM STORM & SECURITY DOORS

The Platinum Collection features our easiest storm door installation system. Use the diagram on the right to record your measurements as shown. If the width measurements vary, record the smallest measurement.

SURFACE MOUNT

The rails mount directly to the face of the exterior door trim and require 3/4" of clearance on each side and up to 1" of clearance above the opening.

Construction styles may vary.

PRE-HINGED FOR EFFORTLESS INSTALLATION

Select **L** (left-hinge) or **R** (right-hinge) as viewed from outside when ordering.

Look for this icon.

RECORD MEASUREMENTS

A	Width	C	Width
B	Width	D	Height

SPECIFY WHEN ORDERING:

- A.** Model Number
- B.** Color
- C.** Required Opening Size (Width x Height)
- D.** Platinum Hinge Side (LH or RH)

DOOR OPENING	MIN. WIDTH	MAX. WIDTH	MIN. HEIGHT	MAX. HEIGHT
32" x 81"	31-7/8"	32-3/8"	80"	81"
36" x 81"	35-7/8"	36-3/8"		

Note: Standard size availability varies by model. Custom size doors are made to fit opening size ordered. Custom doors have extended, variable lead times. Once placed, custom orders cannot be canceled. Shims may be required in certain installation applications.

146 Easy Vent® Selection

TOP BENEFITS

Fresh air on demand. Fresh air or clear views at your fingertips with just a pull on the retractable screen.

Hands-free convenience. Reliable closure and hands-free movement through the entry with a tap on the step-to-hold closer.

Enduring protection. The heavy-duty aluminum frame surrounded by 2X the weatherstrip seal shields your entry against the elements.

Measuring Guide:

STORM DOORS

Use the diagram below to record your measurements as shown.

If the width measurements vary, record the smallest measurement.

For Platinum Collection installation, please see page 18.

RECESS MOUNT

The rails mount inside the opening and require a 1" wide by 1" deep mounting surface.

Construction styles may vary.

UNIVERSAL HINGING

Allows for left-hinge or right-hinge installation.

French Door Kits

¹Accepts mirrored handlesets. Must be ordered separately; includes shipping fee (refer to page 42).

²Custom sizes: Specify hinge side of main operating door as viewed from the outside.

*370-84 is not available in Sandstone or custom sizes.

Note: Larson reserves the right to alter or discontinue any model, specification, warranty or price without notice. Product finish colors are approximate; actual finish colors may vary.

Measuring Guide:

EXISTING FRENCH DOOR OPENING

1. Measure full width of opening from jamb exterior trim where storm doors will attach to the trim.
2. Measure full height of opening from head exterior trim to threshold where storm doors will attach.
3. Compare your dimensions with the standard French storm door opening size guide. If your opening does not match a standard, you need custom French doors.

Note: Continuous wood shims up to 1/4" thick can be installed behind both hinge mounting rails, allowing a given width of standard doors to fit an opening 1/2" wider. Extra long screws will be needed to secure.

1 Front View

With a French door installation, you will have one left-hinge door and one right-hinge door. The astragal included in your French door kit replaces the latch side mounting rail included with each door. The full width drip cap included in the French door kit replaces the top drip caps included with the doors.

See pages 46–48 for size range per series.

ORDERING FRENCH DOOR UNITS

Standard Sizes: Order two standard size doors and a standard size French door kit.

Custom Sizes: Measure the true opening size of the entry and order the doors as **one** custom French door configuration with that measurement in inches. (For example, 73" x 84") Use the same measurement to order a French door kit separately.

TYPICAL LARSON® STORM DOOR FRENCH DOOR INSTALLATION

Kit parts, instructions and astragal vary by model.

2 Top-Down View

FRENCH DOOR KIT

With our French door conversion kits, Larson storm doors are easily adapted for double door entry applications. Each kit includes detailed installation instructions, all necessary hardware, astragal and special drip cap. Refer to French door size guide for proper selection of French door conversion kits. **Inactive handleset available on select models (sold separately).**

Security Storm Doors

Guardzman Collection

BE READY FOR LIFE WITH LARSON

TOO MANY KEYS?

Provide your own hardware so you can open your entry and security doors with the same key.

Select standard entry door hardware with a 2-3/8" backset and a 2-1/8" hole diameter.

Lock Box Location

STANDARD:

Hardware location for Guardsman doors are figured from the top of the opening down to the center of the lever/knob which is mounted in the top hole of the lock box. Based on a standard 81" door this measurement is 38".

CUSTOM:

When ordering, indicate the distance from the top of the door opening to the center of the lock box.

Allowable location is center of the door based on the centered ordered opening height + or - 12".

Example: Opening Height: 83"
Center of Door: 41-1/2"

Maximum Height: 53-1/2" (41-1/2" + 12" = 53-1/2")

Minimum Height: 29-1/2" (41-1/2" - 12" = 29-1/2")

ACCESSORY ADD-ONS¹

PRODUCT OPTIONS	FRAME COLORS & SIZES	ADD PER UNIT
Custom Lock Box Heights Provide measurements when ordering - see above.	Order Custom Sizes	\$80.85
Mail Slot - Silver or Brass Finish Double Doors: Mail slot installed on active door.	Order Custom Sizes	\$250.95
Insect Screen Half screen fits top or bottom.	White, Black - Standard Sizes only (Single Door)	\$57.75
	All Colors - Custom Sizes (Single Door)	\$69.30
	Double Door - 2 Screens	\$138.60

¹Door Options (excluding half screen) are non-retrofitable and must be ordered with the door.

Note: Larson reserves the right to alter or discontinue any model, specification, warranty or price without notice. Product finish colors are approximate; actual finish colors may vary. See your Larson seller or visit larsondoors.com for details on limited warranties and exclusions.

Measuring Guide:

SECURITY STORM DOORS

Use the diagram on the right to record your measurements as shown. If the width measurements vary, record the smallest measurement.

RECESS MOUNT

The rails mount inside the opening and require a 1" wide by 1" deep mounting surface.

Construction styles may vary.

PRE-HINGED FOR EFFORTLESS INSTALLATION

Select **L** (left-hinge) or **R** (right-hinge) as viewed from outside when ordering.

RECORD MEASUREMENTS

Retractable Screen Products

SCREENS FOR YOUR WHOLE HOME

Larson® screen products are designed to fit most existing door or window applications for the patio, lanai, garage, gazebo and front door. In addition to providing instant ventilation, retractable screens offer protection from airborne pests and harsh UV rays.

RETRACTABLE SCREEN BENEFITS

Choose from a complete line of screens which includes options for single door openings as well as large openings up to 315" (26') wide. Available in trending colors and styles to complement your home.

- Protection from airborne, biting pests.
- Easy to install and operate.
- Smooth operation with controlled retraction.
- Supports fresh, natural ventilation.

Find the Right Screen

Use this guide to find the retractable screen that fits your opening and meets your overall needs. Once you have narrowed down your selection, go to each product page for complete details.

Brisa Retractable Screen Door

7721 (Single) 7722 (Double) 7723 (Slider)

A FRESH APPROACH TO FRESH AIR

Open your home to a new world of fresh air and light with the Brisa retractable screen door that pairs smart, contemporary design with smooth operation.

TOP BENEFITS

Worry-free ventilation. Screen provides bug-free air when you need it and retracts out of sight when you don't.

Smooth operation. The EZ-Glide System and ergonomic handle work together for easy, one-hand operation.

30-minute install.¹ Surface mount installation for right- or left-hand operation.

ADDITIONAL FEATURES

- Durable rust-resistant aluminum housing and track provide long-term reliability.
- Subtle stripes prevent walk-throughs.
- Quick-snap track requires no cutting for standard size openings.

- C. Short, Standard, Tall
- D. Frame Color

- Mounts easily on a minimum 1" x 1" surface area.
- No cut, quick-snap track installs easily and adjusts to widths between 32" and 36" for single and sliding door applications, and between 68" and 72" for double doors.

Note: If door is less than 32" wide (single) or 68" wide (double), two simple cuts are required.

Feature Overview

The Brisa retractable screen offers innovative features and smooth operation without compromising on style.

ASSEMBLY

- Simple-to-install quick-snap track means fewer assembly steps and an easier installation experience.
- Speed reducer provides safety and controlled retraction.
- Fits both left- and right-hand inswing and outswing doors with no modification.

SCREEN FABRIC

- Anti-fraying double weave at the top and bottom of the screen fabric.
- Durable screen fabric with subtle safety stripes woven into the fabric provide faint visual cues to help prevent walk-through. Top stripes are for people and bottom for pets.

HANDLE

- Ergonomically designed handle with latch and lock offers simple and secure one-hand operation.
- Locking handle.
- Mechanical latch.

STYLES

- Wide range of standard sizes, including 96" high doors.
- Telescoping width adjustment allows the screen to fit a range of opening widths.
- Stock sizes that fit most typical door sizes.
- Available in single door, double door and sliding patio door sizes.

30-minute or less installation.¹

HANDING

Adjusts easily to fit a left- or right-hand application.

SMOOTH GLIDING, NO SLAMMING

Screen retracts all the way without assistance or banging.

SILL PLATE

Aluminum sill plate with adjustable extenders (no gaps, blunt or sharp edges to step on).

Additional Sizing & Application Detail

Shown below are the size ranges for Brisa single, double and slider options.

The Brisa screen for single- and double-panel hinged doors is surface / face mounted to the front surface of the door brickmould / trim (**see image**).

Doors, door frames and door sills vary by manufacturer. An advantage of surface mounting the Brisa screen is the ability to position it up or down in the opening to best fit the door frame before fastening in place. This makes the Brisa screen extremely versatile and able to fit multiple opening heights.

6'8" high door heights are the most common, however heights vary by geographic region. When installing on a single- or double-hinged door, a 3/4" or greater mounting surface depth is required inside the door frame. For 6'8" high sliding patio doors, refer to installation and mounting instructions.

Surface / Face Mounting on a Traditional Hinged Door.

The Brisa retractable screen door is a surface / face mounted product. However, sizing is determined by door opening rather than the intended placement of the Brisa on the exterior door trim or brickmould. Measure for your Brisa by true opening size.

DOOR TYPE	MODEL HEIGHT	FITS OPENING WIDTHS	FITS OPENING HEIGHTS	TIP-TO-TIP HEIGHT DIMENSIONS OF ASSEMBLED SCREEN HOUSING
Single	Short	32"-36"	78"-79" (e.g. 6'6" doors)	79"
Single	Standard	32"-36"	80"-81" (e.g. 6'8" doors)	81-3/8"
Single	Tall	32"-36"	96"-97" (e.g. 8'0" doors)	97-3/8"
Double	Short	68"-72"	78"-79" (e.g. 6'6" doors)	79"
Double	Standard	68"-72"	80"-81" (e.g. 6'8" doors)	81-3/8"
Double	Tall	68"-72"	96"-97" (e.g. 8'0" doors)	97-3/8"
Slider	Standard	32"-36"	78"-79" (e.g. 6'6" doors)	79-1/4"

- Two cuts required if less than 32" for single doors and 68" for double doors.
- Door designs and thresholds vary. It may be possible to position the screen upwards or downwards to fit an opening size not listed. In such cases, a filler board or trim may be needed. Doors with transoms above the door may also require a filler board or trim before or after installing the screen. Always ensure the bottom of the screen is firmly supported (**see page 62**).
- The Brisa slider fits most traditional 6'8" tall patio doors and includes different mounting hardware and a slightly shorter screen housing. This allows the system to rest in the opening as needed (**see page 66**).

Screen Height Position on a Hinged Door

TYPICAL INSTALLATION:

No filler board should be necessary. The unit can be moved up and down to fit the opening as desired.

ALTERNATIVE INSTALLATION:

A filler board (trim) may be needed if the screen is positioned differently or if the opening height is outside of the recommended size range.

Screens for Single Panel Hinged Doors

Available in three heights — short, standard and tall — to fit most common doors.

Component Dimensions – Single Screen

A mounting flange is positioned 1-1/16" from the outer edge at the back of the screen housing and decorative housing.

The mounting flange requires this 3/4" depth for mounting to the side brickmould / door trim.

Decorative Housing Profile

Screen Housing Profile

Slider Bar Profile

Top Track / Bottom Track

Shown in Locked Position

Screens for Double Panel Hinged Doors

Available in three heights — short, standard and tall — to fit most common doors.

Brisa for Sliding Patio Doors

The Brisa screen for single sliding patio doors is for use with traditional 6'8" high sliding patio doors. **(Fig. A)** This screen features unique mounting hardware and is specially sized so that the screen housing will rest and secure to the outer door frame. The door frame must have a surface to attach the mounting bracket screws. The distance between these screws is 78-1/2". **(See Fig. C & D)** Please see the following images and visit larsondoors.com/screens/brisa-retractable-screens to view the installation video and instructions.

Retractable Screen Products

Inspire Pleated Retractable Screen Door

SEAMLESS INDOOR-OUTDOOR LIVING

Create a smooth transition between indoor and outdoor living with the Inspire pleated retractable screen door.

TOP BENEFITS

-  **Fresh style.** Elegant, pleated fabric provides ventilation with refined design.
-  **Unobstructed access.** The flat bottom guide installs without a runner for easy movement through the entry.
-  **Custom-made ventilation.** Designed to fit single and double doors and openings up to 31-1/2' wide and over 10' high.

ADDITIONAL FEATURES

- Easily move and stop the screen at any position with one hand.
- Includes metal adjustable-height handles.
- Pre-assembled for easy installation without any cutting.

- Custom doors have extended, variable lead times. Once placed, custom orders cannot be canceled. All other orders can be canceled within the first 24 hours.

Measuring Guide:

SINGLE PANEL DOOR SCREENS

Applies only to Escape® and Inspire inside mount applications.

Measuring a typical hinged door for the net screen opening dimensions.

Begin by deciding where best to position the screen. The opening must be plumb, level and square, and the bottom guide of the retractable screen must rest on a flat, level and solid surface. Make any needed adjustments to the opening (or plan and allow for shimming) before measuring for the screen. Determine the **net screen opening dimension** (width x height) as measured from the outermost edges of where the retractable screen will rest. Screens are then made to fit these dimensions. Manufacturing tolerances are **plus or minus 1/16"**. We recommend that with inside the frame installations (**options A or B**) that you **deduct an additional 1/16"** from the width and height dimensions that you submit in order to assure that the screen is not too tight in the opening during installation. If you plan on using shims or threshold transitions, be sure to also deduct appropriately for these. See the product model catalog pages and installation instructions for more detail.

Measuring Guide:

DOUBLE PANEL DOOR SCREENS

Applies only to Escape® and Inspire® inside mount applications.

Measuring a typical hinged double door for the net screen opening dimensions.

Begin by deciding where best to position the screen. The opening must be plumb, level and square and, the bottom guide of the retractable screen must rest on a flat, level and solid surface. Make any needed adjustments to the opening (or plan and allow for shimming) before measuring for the screen. Determine the **net screen opening dimension** (width x height) as measured from the outermost edges of where the retractable screen will rest. Screens are then made to fit these dimensions. Manufacturing tolerances are **plus or minus 1/16"**. We recommend that with inside the frame installations (**options A or B**) that you **deduct an additional 1/16"** from the width and height dimensions that you submit in order to assure that the screen is not too tight in the opening during installation. If you plan on using shims or threshold transitions, be sure to also deduct appropriately for these. See the product model catalog pages and installation instructions for more detail.

Retractable Wall Screen

WS1000 (Single), WS2000 (Double)

A NEW HORIZON FOR VENTILATION

The ideal screen solution for bi-folding, lift-n-slide and other large opening doors and windows, the Retractable Wall Screen fills the home with fresh air.

TOP BENEFITS

Fresh style. Elegant, pleated fabric provides ventilation with refined design.

Smooth operation. Easily move and stop the screen at any position with one hand.

Custom-made ventilation. Designed to fit openings up to 315" wide and 118" high.

ADDITIONAL FEATURES

- The single screen WS1000 can open from either end.
- The double screen WS2000 features two panels that meet in the middle.
- Pre-assembled for easy recessed installation.

SPECIFY WHEN ORDERING:

- A. Quantity
- B. Product Model (WS1000 for Single Panel or WS2000 for Double Panel)
- C. Frame Color
- D. Net Screen Opening Size (Width x Height)

- Measuring & Installation: Designed to be installed within a framed opening (e.g. inset / recess mounted). 1-1/4" or deeper mounting surface required. Prior to measuring, be sure the opening is plumb, level and square and that the bottom guide has a flat, stable and smooth surface to rest on. Adjust the opening as needed.
- 2-piece top guide when over 180" wide.

Note: Extended lead times may apply.

Note: Larson retractable screens provide insect protection and support fresh, natural ventilation in low-wind conditions. Unlike 4-sided rigid framed screens, Larson retractable screens move in and out of a protective cassette and the exposed surface area and edges of the fabric are flexible. Consequently, the wind speed that a retractable screen can withstand (e.g. before the edges of the screen fabric may push out of the guide rails), will depend on the width and height of the opening, the openness factor of the specific screen fabric and other design factors of the model. Retractable screens are not to be kept open or continually exposed to wind, sun, rain or other harsh conditions. Please be sure to use your retractable screen only during low-wind conditions.

Measuring Guide:

WALL SCREEN AND INSPIRE (MULTI-PANEL) SCREENS

Measure for the net screen opening dimensions.

Begin by deciding where best to position the screen. The opening must be plumb, level and square and, the bottom guide of the retractable screen must rest on a flat, level and solid surface. Make any needed adjustments to the opening (or plan and allow for shimming) before measuring for the screen.

Determine the **net screen opening dimension** (width x height) as measured from the outermost edges of where the retractable screen will rest. Screens are then made to fit these dimensions. Manufacturing tolerances are **plus or minus 1/16"**. Because of this, we recommend that you **deduct an additional 1/16"** from the width and height dimensions that you submit in order to assure that the screen is not too tight in the opening during installation.

RECOMMENDED INSTALLATION TYPE

Inside the Frame Installation

(Recess / Inset Mounted)

RECORD FINAL NET SCREEN OPENING DIMENSIONS

W _____

H _____

(Deduct 1/16" from the width and height to order).

BEFORE YOU MEASURE

Before measuring, ordering and installing the screen, ensure that the opening is plumb, level and square and that the bottom of the opening has a flat, stable and smooth mounting surface. If needed, add a metal strip or other material (sourced elsewhere), to create a suitable surface for mounting the bottom guide rail of the retractable screen.

EXAMPLES

Uneven Tile Floor

Aggregate Cement Floor

Angled Door Sill

Retractable Motorized Screen

Models 6+, 7+, 8+, 9+, 10+

ENJOY THE VIEW IN COMFORT

Protect against insects, debris, sun, heat and wind with the Larson® Retractable Motorized Screen and its selection of five purpose-built screens that fully retract for an unobstructed view.

TOP BENEFITS

Effortless operation. Conveniently raise and lower the screen with the push of a button on the remote – or let the automatic sun-wind sensor adjust the screen to match the weather.

Engineered endurance. The edge of the screen fabric is sonic welded to heavy-duty zipper tracks, sealing gaps on all sides and providing extra durability.

Custom-made solutions. Designed to fit openings up to 20' wide and 12' high, depending on screen type.

CLEAR VINYL WITH WEBLON. SURROUND COLORS

Note: See your Larson seller or visit larsondoors.com for details on available product sizes and options. Product finish colors are approximate; actual finish colors may vary. This is a motorized screen, which requires a separate power source to operate. The screen will not move up or down without power. We recommend that you purchase a backup power supply. Windy conditions may affect the performance of the screen. Retract the screen in windy circumstances, during inclement weather and when not needed to support immediate ventilation or prolonged periods of time when not used. Not intended to keep pets or children inside. This product contains one or more devices that comply with UL standards for electrical safety and with part 15 of FCC Rules for radio frequency devices.

Insect Screens

Experience outdoor living without the bugs. Insect screens safeguard against airborne pests and are made of durable, vinyl-coated polyester that resists tears and punctures.

TUFFSCREEN.

Protects against airborne pests.

TUFFSCREEN. NO-SEE-UMS

Protects against even the smallest airborne pests with a tighter weave.

6" Rubber Seal (Black or Gray)	\$14.70/Foot		

Note: For items sold by foot or yard measurements, round up to the next even foot or yard.

Retractable Screen Products

Heavy-Duty Bottom Bar

Available for upgrade on 7+ and 9+ models for extra wind resistance. Standard on 10+ model.

Screen Controls

Conveniently raise and lower the screen with the push of a button on the remote; or let the automatic sun-wind sensor adjust the screen to match the weather.

SOMFY. REMOTE CONTROLS

Simultaneously operate up to 16 screens with the push of a button.

- 1 Channel controls 1 screen.
- 5 Channel controls up to 5 screens or groups of screens.
- 16 Channel controls up to 16 screens or groups of screens.

SOMFY. SUN-WIND SENSOR (Optional)

Automatically lowers up to 16 screens during intense sunlight and raises them during heavy winds.

PROFILES

Diagrams show models 6+ or 8+. Measurements are in inches.

Inside Mount

Scan the QR code to watch the installation video. These instructions describe an **inside or recessed** mount installation.

Outside Mount

Scan the QR code to watch the installation video. These instructions describe an **outside or surface** mount installation.

Measuring Guide:

RETRACTABLE MOTORIZED SCREEN - INSIDE MOUNT

Use these instructions to measure your opening for an inside mount motorized screen.

Supply the final width and final height when ordering.

Retractable Screen Products

Measure distances **A**, **B** and **C** in inches and record below. Take the narrowest measurement and **subtract half an inch:**

This is your final width.

A	Width	B	Width	C	Width	Final Width	
----------	-------	----------	-------	----------	-------	-------------	--

Measure distances **D** and **E** in inches and record below.

The highest measurement is your final height.

D	Height	E	Height	Final Height	
----------	--------	----------	--------	--------------	--

Measuring Guide:

RETRACTABLE MOTORIZED SCREEN - OUTSIDE MOUNT

Use these instructions to measure your opening for an outside mount motorized screen.

Supply the final width and final height when ordering.

Measure distances **A**, **B** and **C** in inches and record below. Take the widest measurement and **add 5 inches:**

This is your final width.

Note: This will allow for the screen to be outside mounted without infringing on the daylight opening.

A	Width	B	Width	C	Width	Final Width	
----------	-------	----------	-------	----------	-------	-------------	--

Measure distances **D** and **E** in inches and record below. Take the highest measurement and **add 10 inches:**

This is your final height.

Note: This will allow for the housing and bottom bar to rest above the opening without infringing on the daylight opening. If there is a header, ceiling or other obstruction above the opening, you can add less than 10 inches to create the final height. However, this will cause the screen to infringe on the daylight opening.

D	Height	E	Height	Final Height	
----------	--------	----------	--------	--------------	--

NatureVue Retractable Window Screen

NatureVue NV100

FRESH AIR IS ALWAYS IN REACH

Transform every window into an opportunity for ventilation using the NatureVue retractable window screen.

TOP BENEFITS

Worry-free ventilation. Screen provides bug-free air when you need it and retracts out of sight when you don't.

Custom-made ventilation. Designed to window openings up to 72" wide and up to 90" high.

FRAME COLORS

White

Almond

Desert Tan

Brownstone

Black

ADDITIONAL FEATURES

- Features a durable finish and BetterVue® fabric.
- A speed reducer provides controlled vertical retraction.
- Thick insect pile seals out insects.
- Includes a metal handle.
- Designed for easy recessed or surface mount installation.

Measuring Guide:

RETRACTABLE WINDOW SCREEN

Measuring for the net screen opening dimensions of a retractable window screen.

There are many different window frame designs and operation types, each with their own mounting requirements. Before measuring, determine the screen placement that will provide the best stability, operation and appearance. Window frame stylization and decorative mouldings may require that you install shims so that the screen can be installed in a stable, plumb and level manner.

Begin by determining the **net screen opening dimension** (width x height) as measured from the outermost edges of where the retractable screen will rest (**see image A**). Screens are then made to fit the net screen opening dimensions. We recommend **deducting an additional 1/16"** from the width and height dimensions in order to assure the screen is not too tight in the opening during installation.

All window screen orders **default to inside the frame (recessed) mounting** unless specifically noted that the screen will be used for **outside (surface) mounting**. When outside (surface) mounting a window screen, please note the type of mounting and then provide the net screen opening dimensions as defined as:

- Width: The tip-to-tip measurement of the final assembled screen cassette (**see image A**).
- Height: The measurement from the outermost edge where the screen cassette will rest to the tip of the side guide rail end cap (**see image A**).

The following illustrations show how to measure the net screen opening dimension of a retractable window screen.

Image A

Image B

The NatureVue retractable window screen can be installed in one of two orientations so that the protruding area of the cassette faces away (most typical – **see image C**), or toward the window frame (**see image D**). The most typical way is for the protruding area of the cassette to face away from the frame. However, it can be useful to reverse the orientation of the cassette for aesthetic reasons or to avoid existing window hardware. For further detail, refer to the Larson installation instructions for the retractable window screen model.

Retail Hardware

Pneumatic Door Closers

Designed for outswing metal, wood or composite storm and screen doors.

White

Black

HEAVY-DUTY CLOSERS

CH1020306 & CH1020506

(Case of 6)

Measuring 12-5/8" center hole to center hole and 1-1/2" in diameter, the heavy-duty closer is built for single-closer use on medium- and heavy-weight doors. Includes mounting brackets and attaching hardware.

STANDARD-DUTY CLOSERS

CH1040306 & CH1040506

(Case of 6)

Measuring 12-5/8" center hole to center hole and 1-1/4" in diameter, the standard-duty closer is built for single-closer use on light- and medium-weight doors or for dual-closer use on heavy doors. Includes mounting brackets and attaching hardware.

STANDARD-DUTY CLOSERS WITH HOLD-OPEN FEATURE

CH1030306 & CH1030506

(Case of 6)

Measuring 12-5/8" center hole to center hole and 1-1/4" in diameter, the standard-duty closer is built for single-closer use on light- and medium-weight doors or for dual-closer use on heavy doors. Hold-open feature offers a hands-free way to keep the door open. Includes mounting brackets and attaching hardware.

Sales Policy

Order the easy way at: larsondoors.com/dealer.

For fast, convenient ordering, use the Larson Easy Ordering system. Enter orders on your own time with immediate confirmation of costs, freight information and ship dates. To get started, visit larsondoors.com/dealer and provide an email address along with business name, address and contact information. Or, email your account information to: webdealers@larsondoors.com.

EMAIL & TELEPHONE ORDERS

1. Orders will be processed as given. Larson Manufacturing Company, LLC will not be held responsible for errors on email or phone orders.
2. An email confirmation of the order will be sent within a few hours. Please verify the information and call with any changes.
3. Review the order carefully. Orders for custom products may not be modified or canceled once they have been placed. Other orders may be canceled within the first 24 hours.

Note: Prices shown in this catalog are Larson List Prices.

SHIPPING & HANDLING

Ground Delivery:

Shipping and handling charges may apply. All products included.

RETURNS

For material shortages, errors, or damaged or defective product, please notify our office immediately.

Pre-authorization of returns for credit is required for all standard size doors and subject to a 15% restocking charge. If product is returned on a carrier, a freight charge may also be assessed. Do not deduct any credits on returned merchandise from the invoice when remitting. Credit memos will be issued from our corporate office.

Note: Once placed, custom door orders cannot be canceled. For warranty questions please visit larsondoors.com/warranty.
